Abstract: Quality of work life (QWL) is a multifaceted concept implying concern for the members of an organization. This present study aims at analyzing the quality of work life of male as well as female staff members working in the Entrepreneurship Development Institute, Kashmir. The analysis has been done by classifying the teachers into gender and designation categories. The findings of the study would have great importance in understanding the prevailing quality of work life and the need for improving the same and the ability to increase the competence of Quality of Work Life (QWL).

Keywords: Quality of Work-life, JKEDI, Chi Square Analysis.
